

# Summary of findings of Proper loan Data of 2005-2014

by Chinelo Linda Okafor

From the analysis done on prosper loan data, it is seen that;

a. Most loan listings were created during working hours. We see a trend increasing from the early mornings and decline towards late evenings.

b. We see that 77.04% of all the loan listings belong to the 36 month duration category.

c. There is correlation between LoanOriginalAmount and MonthlyLoanPayment, borrowers with shorter loan terms tend to have a higher MonthlyLoanPayment.
